Potwin.

Scale 200 ft. = 1 inch.

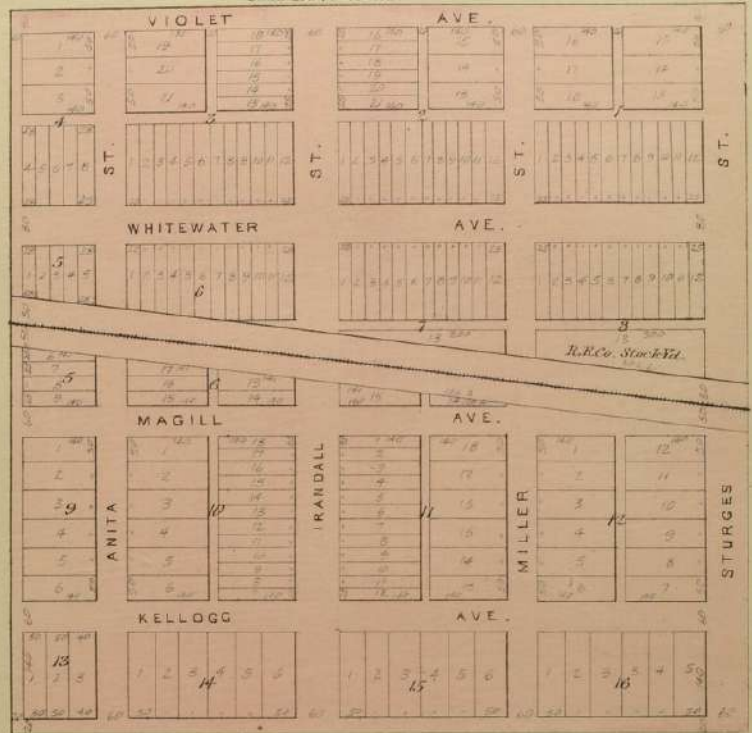

Potwin was originally laid out on forty acres of land in the centre of the N. W. 4. of Sec. 29, T. 24, R. 4, E. of the 6th P. M. The charter to the Potwin Town Co. was granted April 17th, 1885. It now occupies eighty acres of land, running from east to west through the quarter. The town is located on high land, on a series of gentle undulations running from north to south, the drainage being toward the south.

On the town site is a spring of never-failing water, clear as crystal. Water of the same character may be obtained at a thirty foot depth by sinking wells.

The town of Potwin is located in the famous White Water Valley, and three-quarters of a mile east of the stream. It is also but one-half mile from Diamond Creek, and the same distance from the Sulphur Spring on its bank.

Being on high land, its location for health cannot be surpassed, while the trade of one hundred square miles of territory flowing through its streets, makes it the central business point of the White Water Valley.

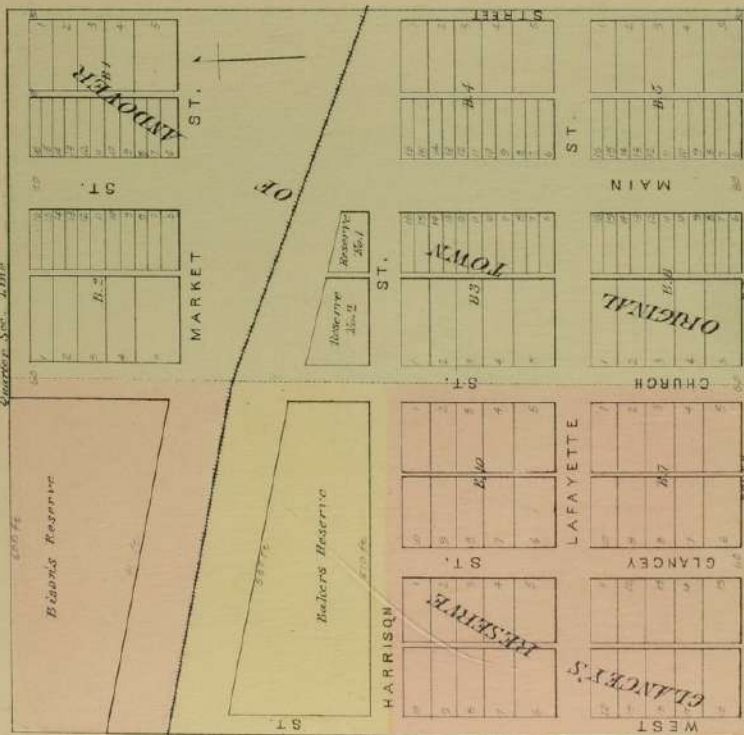

Suitable clay for brick is found on the bank of Diamond Creek, and that industry is one of the features of the town. The banks of the creek are heavily wooded, making fuel cheap.
