GENERAL EXPLANATIONS OF SOURCES USED

The material in this volume was gathered from all sources of information that could be found. The first source was Volume A Cloud County deaths through 1902 in the Cloud County Clerk's office, Concordia, Kansas. This source was derived from the county physicians and is sadly incomplete and we found it inaccurate on many counts. It appears that the Doctors may have waited months to bring in their reports and found their memories wanting. During the time of these records, there would have been at least 5 funeral homes in existence and of those, records are available for only 2. Those are, Rigby & Wilson of Concordia and Turner, of Clyde, and these were added next. Several papers were published during these years and we have scan read all of these for additional information. The Cloud County Genealogical Society has been reading the stones from all County Cemeteries and these records were integrated as we proceeded. In a few cases, our source has been family genealogical records, but only where no other records were found or where additional information was needed.

(Editor's note-The Cloud County Clerk Early Death Records & the Undertaker's reports often referred to the attending physician, so we deemed it of interest to reprint this early list, including age and where practiced.)

#### DEDICATION

Carl Sandburg wrote:

"When a society or civilization perishes, one condition can always be found. They forgot where they came from."

Jeanne Chubbuck has been the driving force behind the organization of the Cloud County Genealogical Society. It has been she who has over the years answered the greatest share of hundreds of genealogical enquiries that have come into Cloud County from all over this country, and she who has provided the answers with countless hours of research. It is the hope of this Society that this compilation will serve her well in the preparation of her research and serve her in her continued affirmation of Sandburg's words.
