INDEX OF DEATHS AND BIRTHS IN DAILY NEWSPAPERS OF
LAWRENCE, DOUGLAS COUNTY, KANSAS, 1864-1872

INTRODUCTION

This index begins with newspapers just before 1864 (29 November 1863) because deaths in Douglas County in earlier newspapers, 1855-63, are already abstracted in the two volumes of *Complete Tombstone Census of Douglas County, Kansas*, published by the Douglas County Genealogical Society. Deaths in newspapers of 1855-60 are covered in volume 1 (1987), pages 254-59, and deaths reported in 1861-63 are covered in volume 2 (1989), pages 420-27. Births are not included in the *Tombstone Census*, but we decided to include births in this index.

About 1,000 entries, by far the greatest number of them deaths, are listed in the present index of deaths and births. For newspapers of March 1873 through July 1880 we plan to publish an index of all genealogically useful information.

WHAT NEWSPAPERS ARE INDEXED?

The Lawrence daily newspapers available in the Lawrence Public Library are indexed. These are the *Kansas Daily Tribune* 29 November 1863 through 10 August 1869 (10 spools of microfilm), the *Republican Daily Journal* 11 August 1869 through 3 March 1872 (6 spools), and the *Kansas Daily Tribune* 5 March 1872 through 4 March 1873 (1 spool and parts of 2 others).

WHAT KINDS OF ITEMS ARE INDEXED?

We indexed each item in the news and letters columns that specified or indicated a death or birth that may have occurred in Douglas County, and/or the person named was a resident or former resident of Douglas County or a relative of a resident of Douglas County, for which the news item indicated an exact or approximate date of the occurrence. Thus, one person's death may be indexed more than once; for example, the death notice, the notice or report of the funeral, and a resolution by the deceased's lodge. An indexed news article may report that the person died one year before, or 10 or more years before. A researcher should read every item indexed for an individual's death, as the name may have been printed differently or different relationships or other details may have been reported. An indexed birth may have been reported soon after the occasion, or indicated by report of a birthday celebration (it could have been the 8th or 82nd birthday).

WHAT PARTS OF THE NEWSPAPERS ARE NOT INDEXED?

Legal notices and commercial advertisements are not indexed.

WHAT IS THE INFORMATION CONTENT OF ITEMS INDEXED?

Lawrence newspapers of the 1860s and 1870s generally did not present full obituaries as modern newspapers do. Usually only the person's name and day of death are given, sometimes the name of a surviving spouse, but rarely the deceased's age, birth place, or other details. Names of infants are usually not given, but parents' names instead, in both death and birth notices. An indication of a birth was usually written in an obscure style, with no caption, as for example, "An important event has transpired in the family of our friend Mr. Menet, the city clerk. The event was a pleasant one and consisted in the appearance into the family of a little daughter." Sometimes an indication of a death is indirect, as "We were shown yesterday by Dr. Abdelal, the small shot which caused the death of Mr. Moore." Death notices printed with no name attached are indexed preceding the "A" names.

The Lawrence newspapers reported some news of Douglas County people outside Lawrence, but much less than for Lawrence people.

ARE PAGE NUMBERS PRINTED ON THE NEWSPAPERS?

The newspapers generally had four pages, and page numbers were not printed. To aid the user, in most cases we have listed a page number; that is, the first, second, third, or fourth page of the order in which they appear on the microfilm. Sometimes a second copy of a page is on the microfilm, in which case we did not count the second copy in our page numbering.

DID THE NEWSPAPERS REPORT ALL THE DEATHS AND BIRTHS THAT OCCURRED?

Occasionally a newspaper would have a "mortuary report" showing the number of deaths during a period of a few weeks or months. Comparison of the number of deaths reported by name with the count in the mortuary report indicates that about one-fourth to less than one-half of the deaths were reported in the newspapers. No comparison is available for births, but we suspect that a very small proportion of the actual births were reported in the newspapers.

HOW CAN COPIES OF THE NEWSPAPERS BE SEEN?

Microfilms of the newspapers indexed are in the Lawrence Public Library and the library of the Kansas State Historical Society in Topeka. Those through 3 March 1872 are also in the Kansas Collection in Spencer Research Library, University of Kansas. Those in the State Historical Society are available on interlibrary loan.

CAN I HAVE SOMEONE MAKE COPIES OF INDEXED ITEMS FOR ME?

Upon written request with payment in advance and clear specification of items wanted, the Douglas County Genealogical Society will make copies of indexed items. The cost in 1999, subject to change in the future, is \$5 for the first item and \$1 for each additional item in the same request. Be aware that additional items for the same person's death or birth may or may not contain additional information. Our address is P.O. Box 3664, Lawrence, KS 66046-0664.

IS THE INDEX COMPLETE AND PERFECT IN EVERY RESPECT?

We have done our best, but there may be some mistakes and omissions. The index has been proofread with the work sheets, but the work sheets have not been checked against the newspapers. If you don't find an item on the page listed, look at the other pages in the same issue. If still not found, look at the previous and following issues. We indexed according to the spelling given in the newspaper, so look for possible alternate spellings or misspellings including typographic errors. For example, if looking for a HANNOLD also look for HONNOLD.

WHAT DID ONE NEWSPAPER HAVE TO SAY ABOUT THE VALUE OF PRESERVING NEWSPAPERS?

A newspaper slightly later than the period indexed (*Daily Kansas Tribune*, 22 November 1874) commented, "The files of our city papers constitute extremely valuable archives, which increase in worth as time rolls on and detailed data of current events in the past become scarcer. Unlike the parent states, Kansas was fortunate in having a vigorous press, contemporaneously with her first settlement, and consequently all important events of her exceptionally eventful history is of record on the pages of her papers. To preserve in the safest and most convenient form complete files of their papers should be the care of our commonwealth and our cities. It occurs to us that here in Lawrence we have a most convenient means through which this may be assured in the future. Our city library is furnished day by day

and week by week with the issues of our local press. Let the city council authorize and instruct the city librarian to carefully preserve the files in her care and from time to time have them bound in a convenient shape for preservation. Their constantly enhancing value would amply repay the trifling expense."

The newspaper said nothing about the value of indexes, possibly because that would have been asking too much at that time.
