**PROTECT YOUR BUILDINGS**  
 A fire almost every thunder storm we hear of more or less damage done by lightning, which damage we claim can be avoided, and all buildings thoroughly protected from damage by lightning, by the simple exercise of a little good judgment in getting E. D. Hawley to rod them in a proper and scientific manner. Mr. Hawley uses, for instance, the new patent Galvanized Rod, which is galvanized with the best German spelter, and is spiral twisted, giving it a beautiful appearance on the building. This rod is the most durable made - will last for fifty years, and as firm in our faith in it that we make the following announcement: We will pay for the Electric Rods to owners of buildings to which our rods are attached in a proper manner, in case it fails to protect the building from damage by lightning. Remember that E. D. Hawley is the only local agent in Franklin County, and that by patronizing him you will be advancing home interests, inasmuch as your money does not then leave the county. He can furnish any lightning rod manufactured, but gives ours the preference. Your work will be done well and cheap and by experienced workmen. Orders may be left at the Kansas City Office.
