

EVERY NAME INDEX

85

The following Every Name index include all names which occur anywhere in this book, a total of 4,859 entries in all. Generally, only the first occurrence of a name on a page is indexed unless there is more than one person of the same name on that page, in which case the number of different entries on that page is given in parentheses. Women are indexed whenever possible under both their maiden and married name(s). The readers are, as usual, cautioned to check under every conceivable spelling.
