AMERICA NEEDS MEAT

Today, the civilian population is increasing faster than livestock can be raised. This means more meat is required than ever before. The need is for lean meat rather than meat with excessive finish.

You farmers, good animal husbandmen, have a real **challenge** to produce the amounts and kind of meat needed. You have **responsibility** to utilize feed in balanced rations in order to get maximum production. You have an **opportunity** to obtain excellent returns from good livestock and good livestock practices.

We wish you every success.
